Meteorological aneroid **BAMM-1** is used to measure atmospheric pressure in the ground at the temperature from 0 to +40 ° C and relative humidity up to 80%.

Specifications weather aneroid BAMM-1

Characteristics	meaning
Range of measured pressure, kPa (mm Hg. Art.)	80 - 106 (600 - 800)
The maximum permissible error of the barometer, kPa (.. Mm Hg), not more than:	
- primary	+ 0,2 (1,5)
- more	+ 0,5 (3,75)
Graduation scale pressure, kPa (mm Hg. Art.)	0.1 (0.5)
BAMM-1 Weight, kg, not more:	
- Without case	0.7
- With case	1
Overall dimensions, not more:	
- diameter	152
- height	90
Average life barometer BAMM-1 , years, not less	6

Barometer refers to products beyond repair.

Package aneroid BAMM-1

Name	amount
Aneroid barometer Meteorological BAMM-1	1 PC.
Case	
Aneroid barometer Meteorological BAMM-1. Passport	1 copy.
Recommendation GSOEI. Barometers weather membrane. Methods of verification	1 copy.
