Milwaukee Avenue (North of Dundee Road)  
WHEELING, ILLINOIS

# Introduction

THROUGH this brief presentation, Ernst Hagerstrom and his fellow craftsmen bring you only a few of the many popular designs to adorn your home or to serve as a gift to a dear friend.

Each of these designs is personally designed by Ernst Hagerstrom and individually crafted by his associates in our new modern workshop.

Selected small gift items on pages 14 and 17 come from fellow craftsmen around the Nation. (The right is reserved to make slight variations from the illustrations and sizes stated because part of the work is carried out by hand.)

The skill of the Hagerstrom Metal Craft Studios is at your command to develop any special ideas and designs you have in mind. Tell us about your desires and let us submit original sketches for your approval. For special work of that kind, please send \$5.00 as a designing fee, and sketch will promptly be mailed for your approval. This fee will be deducted from the price quoted when final order is received.

Hagerstrom Metalcraft makes the perfect gift to the friend who owns a home or garden. Hand-wrought objects will be a reminder of your friendship and your exquisite taste through many years of artistic, as well as practical service.

Special attention is given to articles purchased for gifts. If you will enclose your gift card with your order we will take great care in wrapping the article properly and ship it direct from our studio.

Please feel that you have a standing invitation to visit our studio and workshop the very next time you are in the vicinity of Wheeling. Visitors have written us that they considered their sojourn here as one of the highlights of their trip!

## WEATHER VANES

**MADE TO LAST FOR MANY YEARS:** The Silhouette, Arrow and Arrow Tail and Letters on Wind Directions are made of heavy aluminum. The swivel pin in the roof shaft is made of steel, turning on brass bearings. The weather vane will respond to the slightest breeze. All weather vanes are equipped with compass and arrow. The satin black weather resistant finish will retain its beauty for years. Brackets and screws which make installation easy also are furnished. The weather vanes come in two sizes. **Small** 27" wide and approximately 30" high. **Large** 30" wide, approximately 40" high. The height of the Vane depends on the design of silhouette.

If you prefer the ornamental wind directions as shown on No. 672, add \$4.50 for small and \$6.50 for large to the price of vanes with plain wind directions.

### HOW TO INSTALL WEATHER VANE

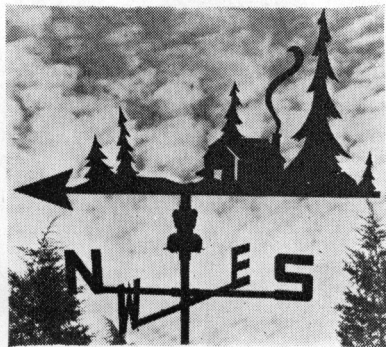

1. Mount the compass to the roof shaft. Bend the bracket to fit the shape of house roof and fasten same with screws.
2. With an authentic compass, determine the correct directions, then tighten the screws.
3. Screw the swivel pin into the cap welded onto the arrow, and tighten.
4. Before inserting the swivel pin holding the vane into the roof shaft, pour or place about 3 inches of light oil into the roof shaft. The installation then is complete.

## LARGE ESTATE AND FARM SIGNS

Signs add a final touch to your grounds and its entrance. They identify your location and enhance the impression of your home to the passer-by.

Any motif you wish can be applied, as the silhouette in the larger farm and estate signs. Please let us know what you want. Enclose \$5.00 designing fee to be deducted when final order is given, and sketch will be promptly mailed, with estimate and delivery time.

These signs hang from sturdy, hand-wrought iron brackets and the frames are also made of wrought iron. Silhouettes and letters cut out of aluminum. Finish satin black, name white.

NO. 695

Size 26" wide,  
22" high,  
Bracket 36"  
wide. Price  
\$95.00. If in  
color, \$25 additional.

The two signs  
"Top Hill" and  
"Pioneer  
Farm" shown  
on front cover  
are the same  
price and size  
as No. 695.

**HOW THE SIGNS ARE MADE** — The house signs have the plate and silhouettes made of heavy gauge aluminum. The sign plate is framed in wrought iron, which adds strength and ornamental beauty. Any of the weathervane silhouettes shown in the folder may be selected for the top of the sign brackets. The names are cut out of aluminum letters and mounted on a bar on both sides of the sign so the whole name can be dismantled by removing two brass screws. This construction of letters avoids any future sign painting and makes it easy for anyone to refinish. The signs are finished in satin black, with the name in white. All signs come with screws for installation.

Limited letters, 20 each side. Additional, 75 cents per letter.

The metal letters on our signs are richer looking, durable, and eliminate sign painter.
