Correspondence asked in relation to Thermometers for Special purposes.

SIGNAL SERVICE, WAR DEPARTMENT,

Washington, D. C., April 10, 1888.

Messrs. D. T. KIDDER & COMPANY,
General Agents Standard Thermometer,
511 7th Street N. W., Washington, D. C.

Gentlemen :

In reply to your note I have the honor to state that I have very carefully compared the Thermometers placed in the Instrument room of the Signal Office under my charge, with the best standard instruments in the possession of the service and found discrepancies so extremely small that they are negligible.

It is difficult to place two instruments under exactly similar conditions of temperature, and I have no doubt that it was owing to this difficulty the minute discrepancies found were due. I was very much pleased with the instruments and consider them perfectly reliable under all conditions of temperature.

Very Respectfully,

Your Obedient Servant,

JOHN C. WALSHE,

Lieut. Signal Corps.

In charge of Instrument Division.

OFFICE OF THE

HARTFORD MACHINE SCREW CO.,

Hartford, Conn., June 30, 1883.

Messrs. Standard Thermometer Co.,
Peabody, Mass.

Gentlemen:

We have given your high test Thermometer a very severe trial, under very trying circumstances, and it gives us great pleasure to state that it works to our entire satisfaction in every respect, in fact we have never seen an instrument that can at all compare with it for the purposes to which it has been applied, namely, for indicating the variation in our Japan Ovens. Kindly send us one for our Varnishing Oven which will stand a heat of 250 degrees. If you do not furnish them direct yourselves, please have your agents forward one, together with the bill for the same, and oblige,

Yours Respectfully,

G. A. FAIRFIELD, *Prest.*

Standard Thermometer Co.,
PEABODY, MASS.
