S & A TRIOMETER

(Three Units)

Precision **Hair Hygrometer (Relative Humidity)** three point tested thermometer tube — **synchronized aneroid barometer adjustable to 4,000 ft.** The hair humidity indicator and the aneroid barometer are set into ship wheels with full ring type, copied from an old wood ship wheel. The thermometer tube is mounted on a flat silver finished scale plate.

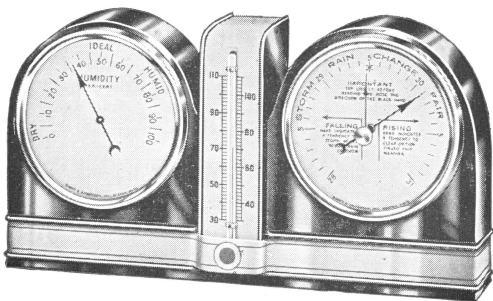

The S & A Triometer units are mounted on a heavy bronze base resting on half ball bearings. The 3" silver dials and silver thermometer scale against a bronze background afford a harmonious and imposing combination with unusual eye appeal. A heavy, sturdy and decorative three unit instrument.

Size overall 11¼" x 5⅜". 3" silver dial, Hair Hygrometer, (Relative humidity) Three point tested thermometer tube, and a precision aneroid barometer.

One Finish — Bronze — **\$15.00 Retail**

S & A Barometers are distinctive in design and up to date. The quality is unsurpassed. Insist on S & A Products.

S & A EMPIRE

Three instruments in one: Relative Humidity, Temperature and Barometer. The new S & A Empire is a stately designed combination, unusually attractive and decorative. Silvered 3" dials with chrome bezels, silver thermometer, silver band inlaid with black bakelite housing. Height 4½", width 8½". It will give you the temperature accurately—the correct percentage of moisture in the air—and forecast future weather changes. Nicely boxed.

Retail \$10.00

NEW S & A MOISTOMETER

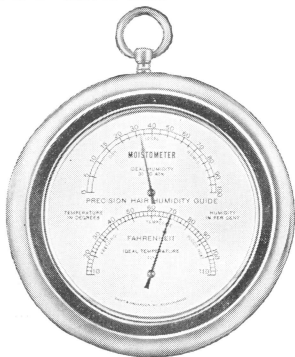

(Relative Humidity & Temperature)
Mounted on a 4" Silver Dial

The new S & A Moistometer must not be confused with many other hygrometers on the market.

The new Moistometer humidity unit is actuated by the use of seven blond human hairs scientifically arranged in a double acting mechanism. The use of a human hair is recognized by engineers to be the most sensitive and accurate means of determining the percentage of moisture in the air (relative humidity). The S & A Thermometer is also a finely calibrated thermometer.

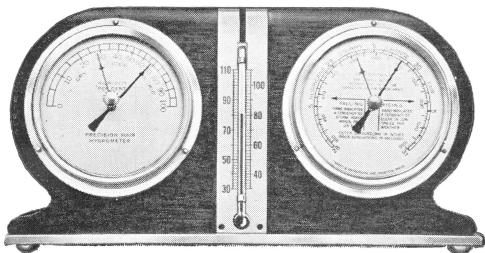

The two units are mounted on a 4" Silver Dial set into a ship's brass frame with black insert. It is decorative for office or home use. It is also designed for industrial use.

Retail \$5.00

S & A IMPERIAL

(3 Units)

The S & A Imperial consists of a Precision Hair Hygrometer (Humidity indicator). Three Point tested thermometer tube, and a synchronized aneroid barometer movement adjustable to elevation up to 4,000 feet. The three units are mounted in a solid block 1½" thick at base and tapering to 1" at the top. Mahogany wood work by the famous Ivers and Pond Piano Co. **The Combination** of ship's brass bezels, Heavy ship's brass base, Silver thermometer scale and 3" silver dials is distinctive and original in design. A real decorative mantel, table or desk model. Size overall 9¾" long, 4¾" high.

Retail \$12.50

THE S & A CLIPPER SHIP WEATHER GLASS

is a true reproduction of the old original
weather glass barometer.

Antique
Stand
and
Glass
Made
En-
tirely
by
Hand

Do not confuse the genuine S & A Clipper Ship Weather Glass with imitations on the market.

The S & A Clipper Ship Weather Glass operates on the same principle as the Aneroid Barometers. Simply charge with water and add Tintex of any color desired. This will make the water more visible in the spout.

Glass hand-made. No two exactly alike. Yet great care is exercised in the making, so that the large air-chamber is in perfect displacement balance with the spout. This is necessary to assure satisfactory results. It requires **seventeen (17) hand operations** to complete the weather glass.

It dates back to 1864
